

Kibana Dashboard using Data in ELK stack.

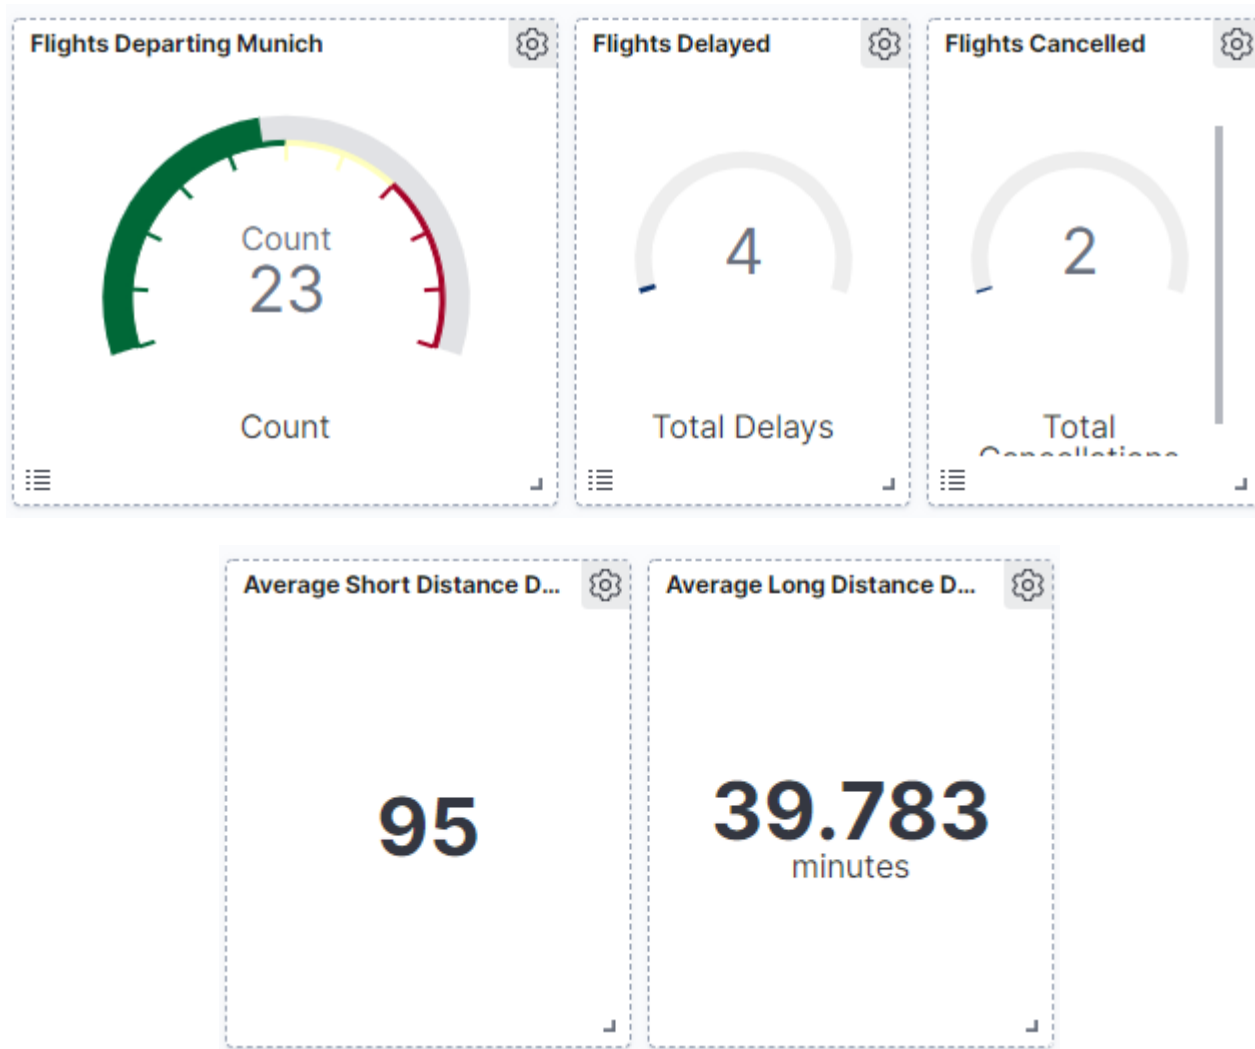

Current Flights departing Munich Airport.

Goal is to explore delayed flights using:

- Diverse chart types
- Streaming log data

Gauges showing Count of Flights Delayed and Cancelled

Maps from data logs in Kibana

Origin airport locations
for flights to Munich
(marker)

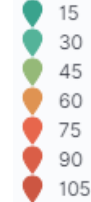

Average delay in minutes
(marker color)

Number of flights arriving
from that location
(marker size)

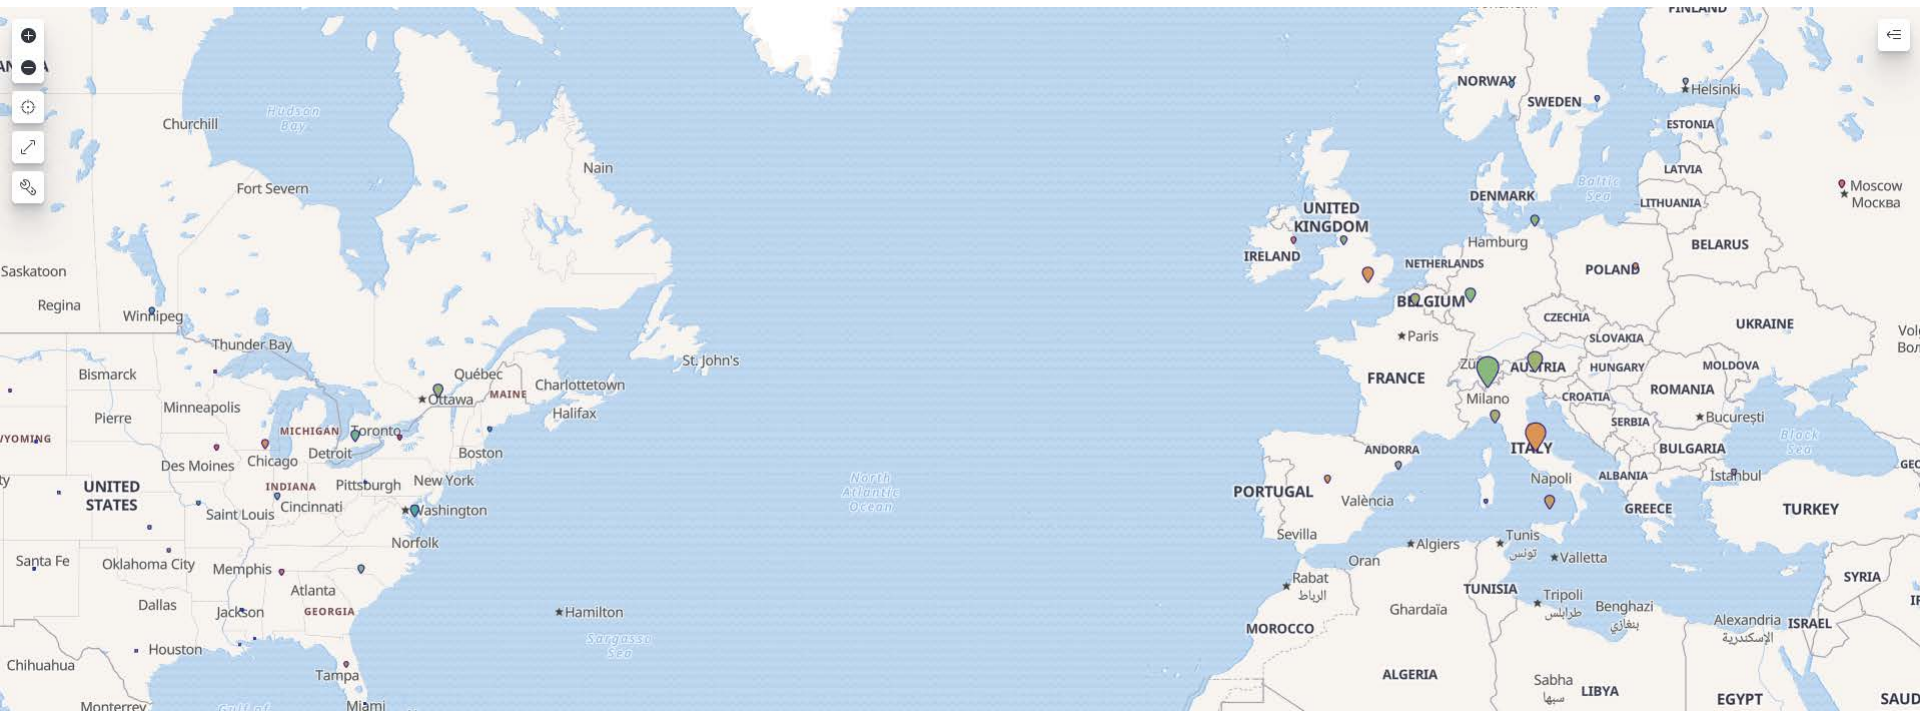

LAYERS

 Flight Origin Location

delay

Number of Flights

Histogram of aggregate delays every 3 hours
